seats, showing available, selected, and already-booked seats

- **Booking Form**: Collects passenger details and payment information (demo mode)
- **Confirmation**: Shows booking confirmation with a unique booking ID and complete journey details

The app follows a smooth multi-step workflow: Search → Select Bus → Choose Seats → Enter Details → Confirmation. Users can navigate back through the steps, and the interface is fully responsive for both desktop and mobile devices.

Suggestions for enhancements:

- Add filters for bus types, price ranges, and departure times
- Implement user authentication for viewing booking history
- Add real-time seat availability updates with Supabase
